Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence)

Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence)

Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence)

This book describes the challenges that critical infrastructure systems face, and presents state of the art solutions to address them. How can we design intelligent systems or intelligent agents that can make appropriate real-time decisions in the management of such large-scale, complex systems? What are the primary challenges for critical infrastructure systems? The book also provides readers with the relevant information to recognize how important infrastructures are, and their role in connection with a society's economy, security and prosperity. It goes on to describe state-of-the-art solutions to address these points, including new methodologies and instrumentation tools (e.g. embedded software and intelligent algorithms) for transforming and optimizing target infrastructures. The book is the most comprehensive resource to date for professionals in both the private and public sectors, while also offering an essential guide for students and researchers in the areas of modeling and analysis of critical infrastructure systems, monitoring, control, risk/impact evaluation, fault diagnosis, fault-tolerant control, and infrastructure dependencies/interdependencies. The importance of the research presented in the book is reflected in the fact that currently, for the first time in human history, more people live in cities than in rural areas, and that, by 2050, roughly 70% of the world's total population is expected to live in cities.

From reader reviews:

Lisa Martin:

Here thing why this Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence) are different and reliable to be yours. First of all reading through a book is good but it depends in the content from it which is the content is as yummy as food or not. Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence) giving you information deeper and different ways, you can find any publication out there but there is no guide that similar with Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence). It gives you thrill looking at journey, its open up your personal eyes about the thing this happened in the world which is might be can be happened around you. You can actually bring everywhere like in park your car, café, or even in your technique home by train. When you are having difficulties in bringing the branded book maybe the form of Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence) in e-book can be your alternative.

Carmen Hamm:

You can spend your free time to see this book this e-book. This Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence) is simple to deliver you can read it in the playground, in the beach, train in addition to soon. If you did not have got much space to bring often the printed book, you can buy often the e-book. It is make you much easier to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Johnny Relyea:

As we know that book is vital thing to add our understanding for everything. By a publication we can know everything we really wish for. A book is a set of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This publication Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence) was filled regarding science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading the book. If you know how big benefit of a book, you can really feel enjoy to read a guide. In the modern era like today, many ways to get book you wanted.

Mabel Maddux:

As a student exactly feel bored to reading. If their teacher questioned them to go to the library as well as to make summary for some reserve, they are complained. Just little students that has reading's soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that studying is not important, boring and can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's

country. Therefore this Intelligent Monitoring, Control, and Security of Critical Infrastructure Systems (Studies in Computational Intelligence) can make you really feel more interested to read.
