Radio Network Planning and Optimisation for UMTS

Radio Network Planning and Optimisation for UMTS

Radio Network Planning and Optimisation for UMTS, Second Edition, is a comprehensive and fully updated introduction to WCDMA radio access technology used in UMTS, featuring new content on key developments. Written by leading experts at Nokia, the first edition quickly established itself as a best-selling and highly respected book on how to dimension, plan and optimise UMTS networks. This valuable text examines current and future radio network management issues and their impact on network performance as well as the relevant capacity and coverage enhancement methods.

In addition to coverage of WCDMA radio access technology used in UMTS, and the planning and optimisation of such a system, the service control and management concept in WCDMA and GPRS networks are also introduced. This is an excellent source of information for those considering future cellular networks where Quality of Service (QoS) is of paramount importance.

Key features of the Second Edition include:

- High-Speed Downlink Packet Access (HSDPA) – physical layer, dimensioning and radio resource management
- Quality of Service (QoS) mechanisms in network for service differentiation
- Multiple Input – Multiple Output (MIMO) technology
- Practical network optimisation examples
- Service optimisation for UMTS and GPRS/EDGE capacity optimisation
- The ‘hot topic’ of service control and management in WCDMA and GPRS networks, that has evolved since the first edition

Companion website includes:

- Figures
- Static radio network simulator implemented in MATLAB®

This text will have instant appeal to wireless operators and network and terminal manufacturers. It will also be essential reading for undergraduate and postgraduate students, frequency regulation bodies and all those interested in radio network planning and optimisation, particularly RF network systems engineering professionals.

From reader reviews:

George Finch:

Now a day people who Living in the era everywhere everything reachable by match the internet and the resources inside can be true or not require people to be aware of each information they get. How people have to be smart in having any information nowadays? Of course the solution is reading a book. Looking at a book can help folks out of this uncertainty Information specially this Radio Network Planning and Optimisation for UMTS book because this book offers you rich info and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it as you know.

Kristen Hancock:

Reading a e-book tends to be new life style with this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Together with book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. Many author can inspire their own reader with their story or their experience. Not only situation that share in the ebooks. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors in this world always try to improve their proficiency in writing, they also doing some study before they write for their book. One of them is this Radio Network Planning and Optimisation for UMTS.

David Packard:

Are you kind of occupied person, only have 10 or even 15 minute in your morning to upgrading your mind ability or thinking skill actually analytical thinking? Then you are having problem with the book as compared to can satisfy your small amount of time to read it because this time you only find book that need more time to be read. Radio Network Planning and Optimisation for UMTS can be your answer since it can be read by anyone who have those short extra time problems.

Joan Beverly:

A lot of e-book has printed but it takes a different approach. You can get it by online on social media. You can choose the top book for you, science, amusing, novel, or whatever through searching from it. It is referred to as of book Radio Network Planning and Optimisation for UMTS. You can add your knowledge by it. Without causing the printed book, it may add your knowledge and make a person happier to read. It is most critical that, you must aware about publication. It can bring you from one spot to other place.
