**The Marmoset Brain in Stereotaxic Coordinates** Xavier Palazzi, Nicole Bordier

Laboratory-bred common marmosets (*Callithrix jacchus*) have a natural lifespan in captivity in excess of 12 years, while their maximum longevity is more than 16 years. Due to its small size, its relatively easy adaptation to laboratory conditions, and neuroanatomical similarities with human species, this animal is considered to represent a convenient primate model for neurosciences and drug development.

The Marmoset Brain in Stereotaxic Coordinates provides a comprehensive guide for those - both researchers and undergraduates - who are interested in the marmoset brain, tissue target characterization and comparative anatomy. The nomenclature and atlas presentation were inspired from existing reference brain atlases in other species, and the high quality of illustrations was achieved thanks to automated whole slide scanning.

### **From reader reviews:**

#### **Pauline Jefferson:**

In this 21st millennium, people become competitive in every way. By being competitive right now, people have to do something to make them survive, being in the middle of the particular crowded place and notice by surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yep, by reading a publication your ability to survive rises then having a chance to stand than other is high. For yourself who want to start reading any book, we give you this particular *The Marmoset Brain in Stereotaxic Coordinates* book as a starter and daily reading book. Why, because this book is greater than just a book.

#### **Julia Hayes:**

Reading a publication tends to be a new life style with this era globalization. With examining you can get a lot of information that will give you benefit in your life. Together with books everyone in this world may share their idea. Books can also inspire a lot of people. Plenty of authors can inspire their very own reader with their story or even their experience. Not only the story that share in the ebooks. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach children, there are many kinds of books which exist now. The authors these days always try to improve their skill in writing, they also do some investigation before they write with their book. One of them is this *The Marmoset Brain in Stereotaxic Coordinates*.

#### **Julia Sullivan:**

Playing with family in the park, coming to see the marine world or hanging out with good friends is a thing that usually you might have done when you have spare time, in that case why you don't try a thing that really opposite from that. Just one activity that makes you not experience tired but still relaxing, thrilling like on a roller coaster you have been ride on and with additional details. Even you love *The Marmoset Brain in Stereotaxic Coordinates*, you may enjoy both. It is a fine combination right, you still want to miss it? What kind of hangout type is it? Oh can occur its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.

#### **George Medrano:**

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some e-book, they are complained. Just minor students that has reading's internal or real their pastime. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore, this *The Marmoset Brain in Stereotaxic Coordinates* can make you sense more interested to read.
