Biodiversity and Pest Management in Agroecosystems

Raymond P Poincelot, Miguel A Altieri

Biodiversity and Pest Management in Agroecosystems Raymond P Poincelot, Miguel A Altieri

Many modern agroecosystems are unstable as a consequence of constant human intervention in crop systems which ignore ecological principles. Biodiversity and Pest Management in Agroecosystems explores entomological aspects of agriculture and analyzes the ecological basis for the maintenance of biodiversity in agriculture. Assembling a wide variety of information on the subject of agricultural diversity for pest suppression, Altieri clearly presents the information and research to expand your understanding of basic principles of pest management. This enables you to devise practical strategies for your specific pest management needs. Altieri describes the theory and practice of enhancing biological pest control in agricultural systems by managing vegetational diversity in the forms of multiple cropping, cover cropping, rotations, and other spatial and temporal designs. Biodiversity and Pest Management in Agroecosystems stresses the importance of assessing each situation separately and developing long-term vegetation management strategies with regard to socioeconomic and cultural factors. It focuses on the ways in which biodiversity can contribute to the design of pest-stable agroecosystems. Altieri includes studies on intercropping, cover cropping, weed management, and crop-field border vegetation manipulation and covers the effects of these diverse systems on pest population density and the mechanisms underlying pest reduction in polycultures. As an amazing amount of research on biodiversity has emerged during the past 15 years, Altieri addresses important topics of concern to those involved in agriculture, such as :

- ecological theory and pest management
 - the role of plant diversity on the biology of beneficial insects
 - insect regulation in diverse agroecosystems
 - manipulation of plant diversity in agroecosystems
 - ecological and socioeconomic implications
- The author's considerable theoretical and practical background from years of research and implementation work in California and Latin America will benefit all who read Biodiversity and Pest Management in Agroecosystems. Private consultants (IPM practitioners), researchers, university students, and farmers interested in IPM, pest control, and biological control will find much of value in book's coverage of entomology, insect ecology, biological control, and vegetation management.

From reader reviews:

Bruce England:

Book is to be different for every single grade. Book for children until finally adult are different content. As it is known to us that book is very important normally. The book Biodiversity and Pest Management in Agroecosystems was making you to know about other expertise and of course you can take more information. It is quite advantages for you. The reserve Biodiversity and Pest Management in Agroecosystems is not only giving you far more new information but also to be your friend when you experience bored. You can spend your current spend time to read your e-book. Try to make relationship together with the book Biodiversity and Pest Management in Agroecosystems. You never really feel lose out for everything should you read some books.

Nichole Gibson:

Now a day people who Living in the era everywhere everything reachable by connect to the internet and the resources in it can be true or not require people to be aware of each details they get. How people have to be smart in acquiring any information nowadays? Of course the answer is reading a book. Looking at a book can help folks out of this uncertainty Information specifically this Biodiversity and Pest Management in Agroecosystems book as this book offers you rich info and knowledge. Of course the info in this book hundred per-cent guarantees there is no doubt in it you know.

Barbara Gunter:

Reading can called brain hangout, why? Because when you are reading a book mainly book entitled Biodiversity and Pest Management in Agroecosystems your mind will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely can be your mind friends. Imaging every single word written in a e-book then become one form conclusion and explanation this maybe you never get ahead of. The Biodiversity and Pest Management in Agroecosystems giving you an additional experience more than blown away your thoughts but also giving you useful info for your better life with this era. So now let us explain to you the relaxing pattern this is your body and mind will probably be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

Hubert Macarthur:

Many people spending their time by playing outside having friends, fun activity having family or just watching TV all day every day. You can have new activity to pay your whole day by looking at a book. Ugh, do you consider reading a book can really hard because you have to accept the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Mobile phone. Like Biodiversity and Pest Management in Agroecosystems which is keeping the e-book version. So , why not try out this book? Let's observe.
