HISTOLOGIA Y EMBRIOLOGIA D'OTTAVIO

Conocer un objeto es reconocerlo cualquiera sea el plano del espacio y la posición en que se lo presente y percibir sus relaciones no solo con otros sino con el ámbito en el que se encuentra y aplicarlo a la solución de desafíos en los que sea ineludible su intervención. Así objetos y conceptos se corporizan de alguna manera; los primeros en espacios determinados y los segundos en sitios menos perceptibles a los ojos humanos pero no por ello menos concretos. Los conceptos como los juicios que los enlazan y como los diversos razonamientos que entran diferencialmente a los juicios se construyen a través de procesos mentales. Tales procesos aun con facetas desconocidas requieren de estrategias de aprendizaje especiales al igual que aquellos que subyacen en la adquisición de habilidades cognitivas comunicacionales y motrices (destrezas). Este texto desarrolla estrategias que permitan a los alumnos en forma individual o grupal la adquisición activa de conocimientos y habilidades proporcionando la base informativa a contenidos posteriores relacionados y sustento formativo para la capacidad diagnóstica. Eso les posibilitará asimilar racionalmente tales adquisiciones disminuir su curva de olvido y aplicarlos a la resolución de problemas.
