Using classic thermodynamic principles as the point of departure, this book supplies the tools required to assess the technical viability of energy conversion processes. A new concept, viz. the exergetic (useful energy) recovery factor is introduced that measures net fraction of the extracted useful energy with respect to the initial exergy of the energy resource. With respect to conventional measures, the exergetic recovery factor can be negative, which indicates that more input exergy is required than extracted. A detailed description of the method will be given by applying it both to fossil fuel based energy resources and renewable energy resources. In addition a simplified procedure is given that gives the non-specialist reader the opportunity to judge both conventional and non-conventional energy resources. The case studies discussed comprise the conventional use of fossil fuel (oil gas and coal) the non-conventional use of fossil fuels (shale gas, underground coal gasification) and non-fossil fuel energy resources like geothermal, solar and wind. The book is an ideal guide for those engaged in the transition from fossil-based fuels to renewable and sustainable energy sources and who want to introduce technically viable new energy extraction technologies, which have a reduced carbon footprint.

From reader reviews:

Charles Eiland:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology). Try to make the book Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology) as your buddy. It means that it can to be your friend when you feel alone and beside that of course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you much more confidence because you can know anything by the book. So , let's make new experience in addition to knowledge with this book.

Patricia Oyler:

The feeling that you get from Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology) may be the more deep you searching the information that hide in the words the more you get enthusiastic about reading it. It does not mean that this book is hard to understand but Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology) giving you joy feeling of reading. The article author conveys their point in specific way that can be understood by simply anyone who read it because the author of this publication is well-known enough. That book also makes your vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this kind of Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology) instantly.

Keith Vanwagoner:

Reading a publication can be one of a lot of exercise that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new details. When you read a book you will get new information due to the fact book is one of a number of ways to share the information or their idea. When you reading through a book especially fictional works book the author will bring someone to imagine the story how the character types do it anything. Third, you can share your knowledge to other folks. When you read this Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology), you could tells your family, friends as well as soon about yours reserve. Your knowledge can inspire different ones, make them reading a book.

Ann Clark:

Do you have something that you want such as book? The reserve lovers usually prefer to choose book like comic, short story and the biggest an example may be novel. Now, why not seeking Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology) that give your fun preference will be satisfied by reading this book. Reading addiction all over the world can be said as the way for people to know world much better then how they react in the direction of the world. It can't be stated constantly that reading routine only for the geeky man but for all of you who wants to possibly be success person. So , for all you who want to start reading as your good habit, you are able to pick Exergetic Recovery Factors of Energy Resources: An Easy to Use Methodology to Assess Energy Projects (Green Energy and Technology) become your personal starter.
