**The Star (The Collected Stories of Arthur C. Clarke Book 3)** Arthur C. Clarke

In the title story of this outstanding collection, a group of cosmonauts discovers the remains of an advanced civilization in a remote star system-destroyed when their sun went supernova. They find that the civilization was very similar to Earth's-and that its people knew of their coming doom centuries before it occurred. What they find leads their chief astrophysicist-also a Jesuit priest-into a deep crisis of faith, sparked by a shocking revelation that has implications not just for history-but for religion.

This collection of short stories demonstrates not only Clarke's technological imagination-but also a deep poetic sensibility that led him to ponder the philosophical and moral implications of technological advances. These stories demonstrate the range of his vision as an author-based on both our scientific potential and the deeper aspects of the human condition.
