**Modeling, Evaluating, and Predicting IT Human Resources Performance** Konstantina Richter, Reiner R. Dumke

Numerous methods exist to model and analyze the different roles, responsibilities, and process levels of information technology (IT) personnel. However, most methods neglect to account for the rigorous application and evaluation of human errors and their associated risks. This book fills that need.

**Modeling, Evaluating, and Predicting IT Human Resources Performance** explains why it is essential to account for the human factor when determining the various risks in the software engineering process. The book presents an IT human resources evaluation approach that is rooted in existing research and describes how to enhance existing approaches through strict use of software measurement and statistical principles and criteria.

Discussing IT human factors from a risk assessment point of view, the book identifies, analyzes, and evaluates the basics of IT human performance. It details the IT human factors required to achieve desired levels of human performance prediction. It also provides a rigorous investigation of existing human factors evaluation methods, including IT expertise and Big Five, in combination with powerful statistical methods, such as failure mode and effect analysis (FMEA) and design of experiment (DoE).

- Supplies an overview of existing methods of human risk evaluation
- Provides a detailed analysis of IT role-based human factors using the well-known Big Five method for software engineering
- Models the human factor as a risk factor in the software engineering process
- Summarizes emerging trends and future directions

In addition to applying well-known human factors methods to software engineering, the book presents three models for analyzing psychological characteristics. It supplies profound analysis of human resources within the various software processes, including development, maintenance, and application under consideration of the Capability Maturity Model Integration (CMMI) process level five.

### **From reader reviews:**

#### **Mary McClellan:**

Is it you who having spare time and then spend it whole day by means of watching television programs or just laying on the bed? Do you need something totally new? This Modeling, Evaluating, and Predicting IT Human Resources Performance can be the solution, oh how comes? A fresh book you know. You are therefore out of date, spending your time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?

#### **Amy Zambrano:**

In this particular era which is the greater individual or who has ability in doing something more are more special than other. Do you want to become certainly one of it? It is just simple solution to have that. What you should do is just spending your time not much but quite enough to have a look at some books. One of the books in the top list in your reading list is actually Modeling, Evaluating, and Predicting IT Human Resources Performance. This book that is qualified as The Hungry Hills can get you closer in becoming precious person. By looking up and review this book you can get many advantages.

#### **Candace Mathieu:**

As a scholar exactly feel bored to reading. If their teacher inquired them to go to the library in order to make summary for some publication, they are complained. Just minor students that has reading's soul or real their leisure activity. They just do what the trainer want, like asked to the library. They go to there but nothing reading really. Any students feel that reading is not important, boring as well as can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Modeling, Evaluating, and Predicting IT Human Resources Performance can make you sense more interested to read.

#### **Sharon Wilson:**

What is your hobby? Have you heard this question when you got students? We believe that that query was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. So you know that little person including reading or as reading become their hobby. You must know that reading is very important in addition to book as to be the factor. Book is important thing to include you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. A substantial number of sorts of books that can you take to be your object. One of them is Modeling, Evaluating, and Predicting IT Human Resources Performance.
