## Taxation: A Fieldwork Research Handbook

Taxation is a subject of enquiry that cuts across a range of disciplines, including law, economics, politics, psychology, history and accountancy, to name a few. However, research into taxation as a social and institutional phenomenon – rather than as abstraction from the real world – is largely neglected.

*Taxation: A Fieldwork Research Handbook* opens up new avenues of enquiry in the research of taxation by offering suggestions on how research might be conducted into actual tax practice, rather than abstract models. This book:

- Introduces tax as a field of enormous potential for research to all social scientists
- Explains the methodological issues relating to tax research
- Provides new opportunities for tax researchers to widen the scope of their enquiries
- Encourages researchers to think differently about this subject

Given the importance of taxation to modern society, not only as a revenue raising mechanism, but also as a tool of governance used to influence social actors, this unique text is a vital read for any social science researcher interested in this subject.
